PRELIMINARY AMENDMENT

Sirs:

Prior to examination of the above-identified patent application, Applicants respectfully request consideration of the following amendments.

IN THE CLAIMS

Please add the following new claims:

37. A process according to claim 18, wherein the exposed metal conductor is an exposed copper conductor.
38. A process according to claim 18, wherein the silver ions are present in the aqueous composition in a concentration of from 0.06 g/l to 32 g/l.
39. A process according to claim 18, wherein the complexing agent of the aqueous solution has a first molarity and the silver ions of the aqueous solution have a second molarity, the first molarity being greater than the second molarity.

40. A process according to claim 18, wherein the complexing agent of the aqueous composition is present in an amount from 0.1 g/l to 250 g/l.

41. A process according to claim 18, wherein the complexing agent of the aqueous composition is selected from the group consisting of ethylenediamine tetra-acetic acid, diethylenetriamine penta-acetic acid, N,N,N',N'-tetrakis (2-hydroxy propyl) ethylene diamine and mixtures thereof.

42. A process according to claim 18, wherein the aqueous composition further includes a compound selected from the group consisting of a surfactant, a wetting agent, a stabilizer, a grain refiner, a tarnish inhibitor and mixtures thereof.

43. A process according to claim 42, wherein the complexing agent is a surfactant that has a concentration of from 1 g/l to 15 g/l in the aqueous solution.

44. A process, comprising the steps of:
applying a mask to cover a metal surface of a substrate, the metal surface having an electropositivity less than an electropositivity of silver, the mask being an insulator; and
contacting the metal surface with an aqueous composition comprising silver ions and a complexing agent that is a multidentate ligand, the aqueous composition having a pH of from 2 to 12, to form a coating of silver on the metal surface, wherein the aqueous composition is free of ingredients selected from the group consisting of ammonium ions, thiosulfate ions and combinations thereof.

REMARKS

CONCLUSION

In view of the foregoing remarks and amendments, Applicants believe that each of pending claims 1-26 and 34-44 is in condition for allowance. A notice to this effect is earnestly solicited.

If, upon receipt and consideration of this amendment, the Examiner believes that this application is not in condition for allowance, the Examiner is respectfully requested to contact Applicant's undersigned counsel at the number given below.
